380L WINE CABINET
HUSWS128DMBZY

HUSKY

## SPECIFICATIONS

MODEL   **HUSWS128DMBZY**

Dimensions	1600mm (H) x 595mm (W) x 675mm (D)
Nett Capacity	380 litres, 64 Bottles* (Upper), 64 Bottles* (Lower)
Temperature Range	5 to 12°C (Upper) 12 to 18°C (Lower)
Cooling Zones	2
Shelves	8
Refrigerant	R600a
Humidity Range	50% - 80% (IEC international standards)
Power consumption	0.57 kwh/24hrs
Input Power	0.7 A
dB level	46

FEATURES

Matte Black Frame

Digital Temperature Display

Anti-Vibration Compressor Feet

Beechwood Shelving

Locks as Standard

LED Internal Light

3 Year Warranty

04/2024

THE KEYS TO PRESERVING THE NATURAL TASTE OF WINE

TEMPERATURE
Although varying temperatures are used for serving, all wines should be stored between 12°C - 14°C. Storing your wine outside of these temperatures can spoil the natural taste.

HUMIDITY
Storing wine at lower than 50% humidity can lead to the cork drying out and shrinking. This can lead to air entering inside of the wine bottle leading to oxidation and odours.

LIGHTING
High amounts of light, particularly damaging UV rays can effect the natural colour and tannins within your wine. This can lead to damaging hydrogen sulphide compounds developing within the wine.

VIBRATIONS
Slight vibrations can accelerate the natural ageing process of wines and lead to a deterioration in flavour and an overall lack of quality.

AIRFLOW
A lack of airflow within a wine cabinet can lead to poor ventilation, stale air and sometimes mould. Active carbon filters help to eliminate odours that can develop within the wine cabinet.
